Plano, TX 75093

Dear Ms. Segal:

I am writing to attest to the rapid progress that I have made by utilizing your treatment protocol of Biolaze. This is my second surgical encounter and my assessed progress is based on a comparison of my first surgical recovery compared to the present, the former being without Biolaz.

Notable the return to function has been less than 1/3-1/2 as my prior surgery. The reduction in edema, pain relief, and scar maturation have been greatly accelerated. The relaxation that I have felt has been unparalleled by any medicament that I have been given, both narcotics and muscle relaxants since my release from the hospital. It is further notable that as I frequent the waiting room of Texas Back Institute, I see persons that undergone surgery at about the same time that I did and see that my recovery is accelerated beyond that of those that are not privy to the benefits of Biolaz.

I want to personally thank Dr. Rashbaum for recommending the therapy and you for providing such a well-coordinated plan and execution in my behalf.

Sincerely,

W.H. Glaze, Sr., MD  
Obstetrician-Gynecologist
