

To whom it may concern -

2/15/6

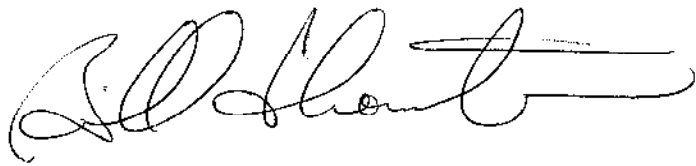

I have been having Dto-Lose treatments for the 4 weeks since my back operation.

I believe the treatments have helped the bruising and swelling to go away faster than I had anticipated. More importantly, there is much less pain than expected.

Since my incision is on my back, I'm told it is also healing rapidly.

The treatments are relaxing and you don't feel a thing.

Thanks to Kim for helping me to recover so quickly from my back fesson.
