

5-30-2007

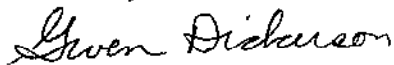

Dear Kim,

I initially came to you seeking help for my sluggish lymphatic system, but your laser treatments have done much more than that for me.

I have experienced the following:

- 1) A 90% decrease in weather sensitivity.
  - I have fibromyalgia, and my muscles would ache a lot anytime there was a storm or high humidity.
- 2) A 70% decrease in thickness of an abdominal scar.
  - It was remarkable to see it had begun to shrink the very next day.
- 3) An increase in lymphatic microcirculation.
  - I have pelvic lymphedema from abdominal surgery, and the laser has decreased the fibrotic tissue, enhancing lymph flow.

Sincerely,

Gwen Dickerson
